PCB83-V430

REVISED TECHNICAL PARAMETERS

Combine 4MP parking detection and space-control functions in an Diameter 118 x 124mm body. Its housing differs from the slimmer PCB81-V430 while providing the same core detection functions.

Parameter	Specification
Model variants	PCB83-V4303 / PCB83-V4306
Parking spaces	3 (single-lens) / 6 (dual-lens)
Image sensor	4MP
AI computing power	1 TOPS
Dimensions	Diameter 118 x 124mm
Power supply	DC 8-48V

Source: manufacturer product specification and confirmed current product master data. This parameter sheet supersedes the inconsistent power field in the previous English datasheet.

Configuration: three-space and six-space variants have different external indicator interfaces. Peripheral modules and power options depend on the ordered configuration.
